Pottstown ARC Planning Trip to W1AW

The Pottstown ARC is planning a bus trip to W1AW (Newington, CT) in April or May of 2020. The trip will be scheduled on a M-T-W or Th. Apparently there is not a lot of interest in traveling on a Friday. If you are interested, following is the contact information. Indicate your preferred date(s). The final date will be whatever seems to work for the group. Contact Harry "Wes" Hammerschmidt, N3HWH. 610-474-2337, or e-mail at hhammer24@comcast.net. I have no other info on the trip. (WA3YLQ)

FISH Donations Accepted

At the November and December Club meetings we collect donations for the FISH (Fellowship In Serving Humanity) organization in Perkasie. I encourage you to go to their web site pennridgefish.org to see their current needs and what this organization does for the Community. Fellow Club Member Bob Nice, N3TZW is a leader in the organization. RF Hill will also give a matching donation at the end of this campaign. (Jim, WA3YLQ)

Kevin (KW3P) Builds an Unconventional Antenna

I have been having problems with receiving on 20 and 10 meters. I thought that a vertical antenna might help. My son suggested that we take the Diamiond HV7A mobile HF antenna off the car and mount it on a piece of metal.

We decided to use the sign we found a few years ago in the attic, which became the ground plane for the antenna. I drilled a 5/8" diameter hole in the center of the sign, and installed a 6" SO239 barrel connector in the hole. I then put the antenna on the top side, and a length of coax on the bottom side. SWR:

10 meters: 1.3 at 28.660 MHz 20 meters: 5.9 at 14.360 MHz 6 meters: 1.37 at 52.860. MHz

Using an external antenna tuner, I should be able to work all of the frequencies on each band. I didn't make any changes to the antenna system from when I took it off the car; I was experimenting to see if the concept would work. Results so far is 1 to 2 S units better using the vertical antenna versus the fan dipole or OCF dipole.
